

# FRYIN 201-E

"FRYIN-201-E" is a continuous fryer with compact size and less energy consumed, it is suited for food shop, restaurant, central kitchen as well as food maker who is ready for continuous production use.

"FRYIN-201-E" is built with lift-able hood, in place clean device (CIP) and coarse filtration, such devices are helpful to get efficient cleaning and maintenance of machine and cooking oil can be used longer.

More features including speed adjustable conveyor for frying time control, gas burner system for efficient heating, oil temperature display & control and overheat protection along with emergency stop to ensure operator safety and machine function

"FRYIN-201-E" is appropriated for multi products with less capacity demand jobs. Many benefits to be achieved including automation, capacity increasing, manpower saving, working environment improvement and product quality identified by using this full function fryer.

## PRODUCT FEATURE

Compact Machine  
2611 x1126x1480mm

Oil Circulation  
Pressure Sensor

Over-heat  
Procate Sensor

CIP: Cleaning  
in Place

Temperature Control  
& Monitor Display

Alarm Records  
in System
